

# Virtual Classrooms at the Jewish Museum London

Our award-winning workshops can now be experienced through our Virtual Classrooms offer for Primary and Secondary students. Each session is based on a guided exploration experience of our unique collection of authentic objects

- Explore Jewish religion and culture through objects
- Use critical thinking to ask questions and spark discussion
- Authentic and interactive experience for your students

Our sessions use high res images from our collection and critical thinking techniques to help students look closely at objects and understand what it means to be Jewish in Britain today. Topics include: Torah, Jewish festivals, Keeping Kosher, Tzedakah, and more.

All our sessions are 60 minutes long.
