

## Accounting Package

This month saw the start of the trial use across the diocese of MyFundAccounting and MyGiving - software designed especially for church accounts and donations and Gift Aid management from Data Developments. Even in this short time, we have had a very healthy take up which gives confidence that this is the right path.

However, we still need you to join the scheme, as the more churches that are included, the more we can review the trial and – if needed – tailor the pilot to suit your needs even more.

If you would like to see the software before joining, why not join us for an online presentation on 2nd November at 4.00pm?

Please register by clicking <https://event.webinarjam.com/channel/SalisburyMFA> .

You can have a look at the facilities, ask questions and, if you wish, you can then sign up for a free trial – which also includes training and technical support, should you require it.

The software is designed to assist and ease the work of the treasurer and Gift Aid secretary. It automates most of the processes needed, produces accounting and fund reports at the click of a button, submits Gift Aid and GASDS claims directly to the HMRC, includes training and support plus much, much more.

As treasurers resign, filling these important roles becomes more difficult, as the role can seem daunting. Working together we believe that this overall package of software, support and training will really benefit and support existing treasurers as well as help encourage new volunteers to the role.
